

SCHEDULE "F"

Street Light Service

Availability:

Applicable to 1) All-night service for street and highway lighting where the customer owns, maintains, and operates the lighting fixtures and all circuits and appurtenances on the customer's side of the delivery point and 2) All pole mounted devices as specified in the Special Terms and Conditions section below for non-lighting devices. The service voltage shall be the available distribution voltage at the point of delivery.

RATE:

NON-FUEL ENERGY CHARGE:

All kWhr per month - per kWhr      15.5501 ¢

Surcharges, Clauses, and Fees

All rates and charges applicable to this rate schedule from surcharges, clauses, and fees approved by the Commission shall be included in the customer bill, including those from the Energy Cost Recovery Clause, Purchased Power Adjustment Clause, Revenue Balancing Account Provision, Integrated Resource Planning Cost Recovery Provision, Public Benefits Fund Surcharge, and Green Infrastructure Fee Surcharge.

Minimum Charge:

\$35.00 per month per delivery point.

Determination of Energy and Demand:

Metered Service:

The monthly billing kWh energy shall be as metered at the point of delivery.

HAWAII ELECTRIC LIGHT COMPANY, INC.

Schedule "F" (Continued)

Unmetered Service:

The billing demand for each month shall be the connected kW load of the lamp and appurtenances rounded to nearest one-tenth kilowatt.

The monthly kWh energy for billing purposes shall be the kW billing demand times 340 hours.

Special Terms and Conditions:

Service will be metered at the point of delivery except as provided for below.

Multiple street lighting lamps may be individually served unmetered at secondary voltage along public streets and highways when, (1) in an overhead area, secondary voltage is available on the lamp pole or (2) in an underground area, secondary voltage is available along the public street. The total connected lamp load per connection point shall not exceed 2 kW. A one-year contract is required for service under this provision and each such contract will remain in effect from year to year thereafter unless, after the first year, terminated by 30-days notice in writing. Each contract will constitute a point of delivery.

The customer will provide a switching device for each lamp to limit the annual burning time to not more than 4100 hours.

The charges in this schedule are based on the premise that secondary voltage is available at the point of delivery. If it is not available, the customer may take primary voltage or may make an advance to the Company in the estimated amount to make such service available.

No street lighting fixtures or facilities will be furnished by the Company under this schedule.

Non-lighting devices for security, public safety, and communication applications may be connected to street lighting facilities and served under this rate schedule. Service to such devices may be provided on either a metered or unmetered basis.

HAWAII ELECTRIC LIGHT COMPANY, INC.

Transmittal Letter dated October 28, 2011.

Schedule "F" (Continued)

For unmetered service to non-lighting devices, the total connected load, including any unmetered street lighting load on the same service, shall not exceed 2 kW. A one-year contract is required for unmetered service for non-lighting devices, and shall remain in effect from year to year thereafter, unless, after the first year, terminated by 30 days notice in writing. The customer is responsible for notifying the Company of any changes in non-lighting loads served under the contract on a timely basis. For unmetered service, the monthly billing kilowatt-hours will be established in the contract, and will be based on equipment manufacturer's documentation or documented average consumption. If the manufacturer's documentation or documented average consumption is not available, the Customer has the responsibility of providing the information necessary to establish kilowatt-hour consumption in a manner satisfactory to the Company.

A pole mounted device is a device that is mounted on a Company approved pole. A non-lighting device is a device that is not used for lighting, and is a pole mounted device. A lower-power usage device is a device with a power requirement below the 2 kW requirement.

Rules and Regulations:

Service supplied under this rate shall be subject to the Rules and Regulations of the Company.

HAWAII ELECTRIC LIGHT COMPANY, INC.
