

SCHEDULE "J"

General Service Demand

Availability:

Applicable to general light and/or power loads which exceed 5,000 kWh per month or which exceed 25 kW of demand three times within a twelve-month period, but are less than 200 kW and supplied through a single meter.

Service will be delivered at secondary voltages as specified by the Company, except where the nature or location of the customer's load makes delivery at secondary voltage impractical, the Company may, at its option, deliver the service at a nominal primary voltage as specified by the Company. Service supplied at primary voltage shall be subject to the special terms and conditions set forth below.

This Schedule is closed to new customers with maximum measured kW demand equal to or greater than 200 kW, after January 13, 2011. Existing customers with maximum measured kW demand equal to or greater than 200 kW may continue to receive service under this Schedule, until the customer transfers to another applicable rate schedule.

Customers who have loads that are less than or equal to 5,000 kWh per month and maximum measured kW demand less than or equal to 25 kW, for 12 consecutive months, will be transferred to Schedule G at the beginning of the next billing period.

RATE:

CUSTOMER CHARGE:

Single phase service - per month	\$43.00
Three phase service - per month	\$69.00

DEMAND CHARGE: (To be added to Customer Charge)

All kW of billing demand - per kW	\$13.00
-----------------------------------	---------

NON-FUEL ENERGY CHARGE: (To be added to Customer and Demand Charges)

All kWhr - per kWhr	9.6448 ¢
---------------------	----------

HAWAII ELECTRIC LIGHT COMPANY, INC.

Schedule "J" (Continued)

Minimum Charge:

The monthly minimum charge shall be the sum of the Customer and Demand Charges. The Demand Charge shall be computed with the above demand charge rate applied to the kW of billing demand for the minimum charge calculation specified below.

Determination of Demand:

The maximum measured kW demand for each month shall be the maximum average load in kW during any fifteen-minute period as indicated by a demand meter. The billing demand for each month shall be the maximum measured kW demand for such month or the mean of the current month's maximum measured kW demand and the highest maximum measured kW demand for the preceding eleven months, whichever is higher, but not less than the minimum billing demand of 25 kW.

The billing kW for the minimum charge calculation each month shall be the maximum measured kW demand for the month but not less than the highest maximum measured kW demand for the preceding eleven months nor less than 25 kW.

Power Factor:

When a customer's maximum measured kW demand equals or exceeds 200 kW, the following power factor adjustment will apply for all succeeding billing periods.

The above non-fuel energy and demand charges are based upon an average monthly power factor of 85%. The customer's power factor adjustment rate shall be calculated as  $[(85 - \text{average monthly power factor percentage}) \times 0.10\%]$ . The average monthly power factor will be determined from the readings of a kWh and KVARh meter. The KVARh meter shall be ratcheted to prevent reversal in the event the power factor is leading at any time. The power factor will be computed to the nearest whole percent. In no case shall the power factor be taken as more than 100% for the purpose of computing the power factor adjustment rate.

HAWAII ELECTRIC LIGHT COMPANY, INC.

Schedule "J" (Continued)

The sum of the customer's non-fuel energy and demand charges, as computed under the above rates, plus 10.2440 cents per kWh, shall be multiplied by the customer's power factor adjustment rate to determine the power factor adjustment to be applied to the customer's bill.

Primary Supply Voltage Service:

If the customer takes delivery at the Company's supply line voltage, the customer will receive a credit calculated as the sum of their demand charge, non-fuel energy charge, and 10.2440 cents per kWh multiplied by 2.6%. When customers' transformers are adjacent to the delivery point, the Company may permit the customer to be metered at a single point on the secondary side of his transformers where such point is approved by the Company. When the energy is metered on the secondary side of the customers' transformers, the customer will receive a credit calculated as the sum of their demand charge, non-fuel energy charge, and 10.2440 cents per kWh multiplied by 0.7%.

Surcharges, Clauses, and Fees:

All rates and charges applicable to this rate schedule from surcharges, clauses, and fees approved by the Commission shall be included in the customer bill, including those from the Energy Cost Recovery Clause, Purchased Power Adjustment Clause, Revenue Balancing Account Provision, Integrated Resource Planning Cost Recovery Provision, Public Benefits Fund Surcharge, and Green Infrastructure Fee Surcharge.

Rules and Regulations:

Service supplied under this rate shall be subject to the Rules and Regulations of the Company.
