

RULE NO. 15

Supply to Separate Premises and Resale of Electric Energy

A. SEPARATE PREMISES

Where the Company has adequate service facilities to supply separate premises, two or more separate premises, even though owned, leased or operated by the same customer, will not be supplied with electric energy through the same meter. However, if the separate premises utilize commercial service and are owned, leased or operated by the same customer and said separate premises and commercial electric service are used by the customer in substantially the same or directly sequential activities, the separate premises shall be served through the same meter if requested by the customer. In the latter case, the customer must provide an easement or right-of-way connecting said separate premises suitable for overhead or underground electric lines. The easement or right-of-way and the overhead or underground electric lines must meet the same requirements for construction, operation, inspection and maintenance of General Order Nos. 6, 7, and other rules of the Public Utilities Commission as if they were owned and operated by a utility company.

B. RESALE OF ELECTRIC ENERGY

The customer shall not resell any of the electric energy received by him from the Company, except for use solely as motor fuel for light duty plug-in electric vehicles. A light-duty vehicle is defined as a passenger car or passenger car derivative capable of seating 12 passengers or less.

HAWAII ELECTRIC LIGHT COMPANY, INC.
